

BCTR v4 Back Cover Card

Stable objects survive questioning. Questioning generates tails. Tails reveal debt. Packets pay debt. Return verifies ownership. The tail becomes the next core. Wrong answers are coordinates.

Symbol	Meaning
O	stable object
A	agent
M(O)	stability matrix
T(O)	tail
D(O,A)	debt
P(D)	packet
X(O,A)	crossing

Master formula:

O -> M(O) -> T(O) -> D(O,A) -> P(D) -> X(O,A)

Debt	Signal
Entry	no stable start
Continuity	feels unrelated
Transformation	cannot survive a new form
Reconstruction	cannot rebuild
Return	cannot find the way back
